Monday - Guided Reading

Lesson 1

L- To engage with the text and the main character.

Follow the steps and learning set out in the video link below.

Copy and paste the website link into internet browser to access

<https://classroom.thenational.academy/lessons/to-engage-with-the-text-and-the-main-character-70r34d?activity=video&step=1>

Monday - English

Lesson 1

L- To generate vocabulary to write the opening.

Write all work into your workbook or on a piece of paper or alternatively record onto Purple Mash.

Copy and paste the website link into internet browser to access

<https://classroom.thenational.academy/lessons/to-generate-vocabulary-to-write-the-opening-c9j3ct>

Monday-Maths

L- To be able to consolidate and review multiplication

Warm Up:

1) Which number is not in the 4 times table?

4 12 14 20 24

2) Which number is in the 5 and 7 times tables?

5 7 25 50 70

3) Fill in the missing numbers in the sequence.

____ 15 ____ 21 24

4) Fill in the missing numbers in the sequence.

30 ____ 20 ____ 10

Click on the link below to access the learning for today

<https://whiterosemaths.com/homelearning/year-5/week-8-number-multiplication-division/>

Monday-Maths

L- To be able to consolidate and review multiplication

1 What numbers are represented?

Complete the sentence.

These numbers are all _____ of 5

2 Complete the number track.

3 a) List all the multiples of 2 up to 20

b) List all the multiples of 4 up to 20

c) What do you notice about the multiples of 2 and 4?

d) Is the number 47 a multiple of 4?

Explain how you know.

4 a) Which of these numbers are multiples of 3?

23 6 13 18 21 32

b) The table shows four more multiples of 3

Multiple of 3	75	126	432	9,735
Sum of the digits				

What do you notice about the sum of the digits in each number?

5 Multiples of 5 always have a 5 in the number.

Is the statement true or false?

Explain your answer.

6 Which number is the odd one out?

Explain to a partner why it is the odd one out.

7 Here is part of a hundred square.

11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40

a) Colour the multiples of 3

b) Draw a circle around all the multiples of 2

c) Some numbers have been coloured **and** circled.

What do you notice about these numbers?

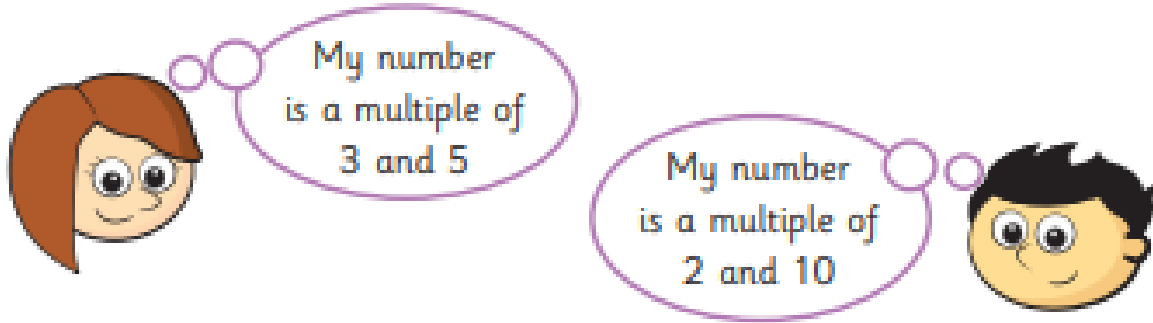

After you have watched the video have a go at the questions on the worksheet.

Answer in your books or on a piece of paper.

Monday-Maths

L- To be able to consolidate and review multiplication

- 8 Rosie and Jack are each thinking of a number.

Could they be thinking of the same number?

Explain your answer.

- 9 Scott's age is a multiple of 8 and 12

His age is one away from a multiple of 7

He is younger than 50 years old.

How old is Scott?

- 10 Write the multiples of 15 between 250 and 350

Compare answers with a partner to make sure you have them all.

After you have watched the video have a go at the questions on the worksheet.

Answer in your books or on a piece of paper.

Can you come up with a rule for multiples?

Monday-Maths

L- To be able to consolidate and review multiplication

Multiples

Rose Maths

1 What numbers are represented?

5

10

15

20

Complete the sentence.

These numbers are all multiples of 5

2 Complete the number track.

3 a) List all the multiples of 2 up to 20

2, 4, 6, 8, 10, 12, 14, 16, 18, 20

b) List all the multiples of 4 up to 20

4, 8, 12, 16, 20

c) What do you notice about the multiples of 2 and 4?

d) Is the number 47 a multiple of 4? NO

Explain how you know.

All multiples of 4 are even.

4 a) Circle all the multiples of 3

23 6 13 18 21 32

b) The table shows four more multiples of 3

Multiple of 3	75	126	432	9,735
Sum of the digits	<u>12</u>	<u>9</u>	<u>9</u>	<u>24</u>

What do you notice about the sum of the digits in each number?

They are multiples of 3

5 Multiples of 5 always have a 5 in the number.

Is the statement true or false? false

Explain your answer.

10 is a multiple of 5 and doesn't have a 5 in the number.

6 Which number is the odd one out?

Tick your answer.

Various answers e.g.

8 56 6 16

Explain to a partner why it is the odd one out.

7 Here is part of a hundred square.

11	<u>12</u>	13	14	<u>15</u>	16	17	<u>18</u>	19	20
<u>21</u>	22	23	<u>24</u>	25	26	<u>27</u>	28	29	<u>30</u>
31	32	<u>33</u>	34	35	<u>36</u>	37	38	<u>39</u>	40

a) Colour the multiples of 3

b) Draw a circle around all the multiples of 2

c) Some numbers have been coloured and circled.

What do you notice about these numbers?

8 Rosie and Jack are each thinking of a number.

My number is a multiple of 3 and 5

My number is a multiple of 2 and 10

Could they be thinking of the same number? Yes

Explain your answer.

They could be thinking of 30, 60 etc.

9 Scott's age is a multiple of 8 and 12

His age is one away from a multiple of 7

He is younger than 50 years old.

How old is Scott?

48

10 Write the multiples of 15 between 250 and 350

255 270 285 300 315 330 345

Compare answers with a partner to make sure you have them all.

Mark your work.

How did you do? Can you complete your corrections?

What does the word multiple mean?

Monday - Art

L- To explain some of the features of art from historical periods.

Copy and paste the website link into internet browser and watch the U Tube video.

https://www.youtube.com/watch?v=qlxsE_KOvbE

Create a mind map of what you have learnt from the video

Ancient Greek Vase

Task: Create your own golden Olympic drawing using Purple Mash. Select from your To Do's.

Monday - PE

L-To reflect on my throwing techniques

What did you learn after each throw?

Copy and paste the website link into internet browser to access this clip.

https://www.youtube.com/watch?v=ltZDzlEeP_4&list=PLnwoPgo24bhmqV8Y76iXnwYw9T9AlxbqJ&index=4&t=0s

Home Physical Education

Can you play fairly and keep the score?

How to play:

- With a partner, each player places three targets (battleships) in front of them.
- Players take turns to throw an object towards their opponent's battleships.
- Each time a battleship is hit, it is removed.
- Players are not allowed to stop the object from hitting a battleship.
- The winner is the first player to hit all of their partner's battleships

Can you keep trying even if you miss the target?

Top Tips

Throwing Underarm

Step forwards with one foot, releasing the ball from low to high using your opposite hand

Let's Reflect

What did you learn after each throw to adapt for the next?

How did you keep focused?

THE DEAN TRUST

Partington Central Academy

Tuesday

Tuesday Spelling

Can you write a sentence with each of these words?

Can you include a relative clause?

Mr Fox, who was wearing a new jumper, felt comfortable.

When adding *-able*, *-ably*, *-ible* or *-ibly* you sometimes need to change the root word slightly. Words ending in *y* change to *i*, and words ending in *e* often drop the final *e*. But be careful: there are exceptions!

Change the following nouns to adjectives by adding *-able* or *-ible*.

excite

excitable

rely

use

.....

understand

collect

.....

response

like

.....

reason

comfort

.....

reverse

sense

.....

agree

Now use some of these words to write sentences of your own.

Tuesday - Guided Reading

Lesson 2

L- To make inferences about the main character.

Follow the steps and learning set out in the video link below.

Copy and paste the website link into internet browser to access

<https://classroom.thenational.academy/lessons/to-make-inferences-about-the-main-character-6wwp8d>

Tuesday - English

Lesson 2

L- To generate vocabulary about being confident.

Write all work into your workbook or on a piece of paper or alternatively record onto Purple Mash.

Copy and paste the website link into internet browser to access

<https://classroom.thenational.academy/lessons/to-develop-a-rich-understanding-of-words-associated-with-being-confident-cgt3ar>

Tuesday-Maths

L- To be able to find the factors of a given number

Warm Up.

1) What is the lowest common multiple of 5 and 8?

2) Which number is not a multiple of 9?

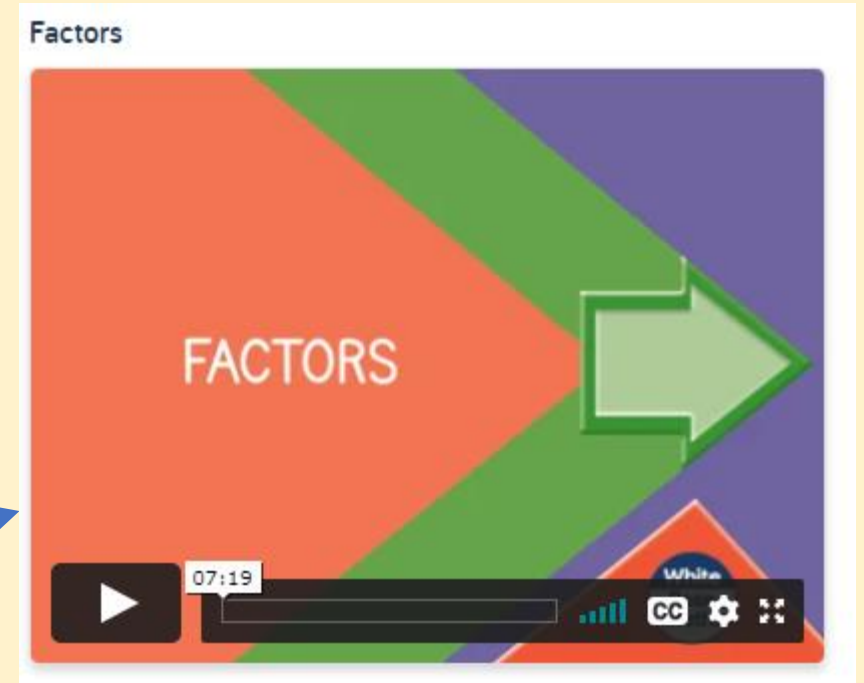

97 81 54 18

3) $___ \times 8 = 32$

4) $6 \times 3 = ___ - 8$

Click on the link below to access the learning for today

<https://whiterosemaths.com/homelearning/year-5/week-8-number-multiplication-division/>

Tuesday-Maths

L- To be able to find the factors of a given number

- 1 Alex arranges 16 counters in different ways.
She is trying to work out some factors.

- a) Use the array to complete the sentence.

and are both factors of 16

- b) Alex rearranges the counters.

How does this array show that 5 is not a factor of 16?

- 2 Use 20 counters.

- a) Show that 2 and 10 are factors of 20
b) Rearrange the counters to show why 4 and 5 are also factors of 20
c) Show why 6 is not a factor of 20

- 3 a) Complete the diagram to show the pairs of numbers that multiply to make 12

List all the factors of 12

- b) Draw a similar diagram to show the pairs of numbers that multiply to make 24

List all the factors of 24

- 4 a) List all the factors of 32
b) How can you check that you have found all the factors?

- 5 a) Which numbers are factors of 30?

5 15 25 3 30 4 2 12 60 0

- b) These numbers are all factors of a 2-digit number.

1 3 5 9

What could the number be?

After you have watched the video have a go at the questions on the worksheet.

Answer in your books or on a piece of paper.

Tuesday-Maths

L- To be able to find the factors of a given number

6 Amir and Eva are describing numbers using factors.

Amir

The number 11 does not have any factors.

Eva

My number lies between 20 and 25. It only has two factors.

a) Is Amir correct?

Explain your answer.

b) What number is Eva thinking of?

7 Which number has the most factors?

64

48

8 Explain the mistakes that have been made.

a) 20, 30 and 40 are all factors of 10

b) 0.5 is a factor of 8 as 16 halves equals 8

9 How do we know that these statements are true?

a) 5 is a factor of 195 but not a factor of 196

b) 3 is a factor of 177 but not a factor of 178

c) 20 is a factor of 180 but not a factor of 190

10 Is this statement always, sometimes or never true?

A number will always have an even number of factors because factors come in factor pairs

After you have watched the video have a go at the questions on the worksheet.

Answer in your books or on a piece of paper.

Can you come up with a rule for factors?

Factors

- 1 Alex arranges 16 counters in different ways. She is trying to work out some factors.

- a) Use the array to complete the sentence.

and are both factors of 16

- b) Alex rearranges the counters.

How does this array show that 5 is not a factor of 16?

The bottom row isn't complete

- 2 Use 20 counters.

- a) Show that 2 and 10 are factors of 20
 b) Rearrange the counters to show why 4 and 5 are also factors of 20
 c) Show why 6 is not a factor of 20

- 3 a) Complete the diagram to show the pairs of numbers that multiply to make 12

List all the factors of 12

1, 2, 3, 4, 6, 12

- b) Draw a similar diagram to show the pairs of numbers that multiply to make 24

List all the factors of 24

1, 2, 3, 4, 6, 8, 12, 24

- 4 a) List all the factors of 32

1, 2, 4, 8, 16, 32

- b) How can you check that you have found all the factors?

- 5 a) Circle the factors of 30

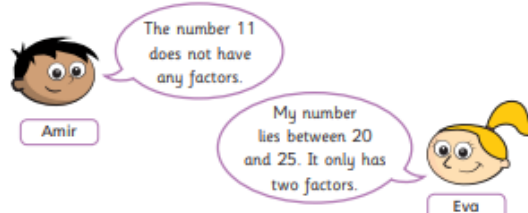

5 15 25 3 30 4 2 12 60 0

- b) These numbers are all factors of a 2-digit number.

1 3 5 9

What could the number be?

- 6 Amir and Eva are describing numbers using factors.

- a) Is Amir correct? No

Explain your answer.

1 x 11 = 11 so 1 and 11 are factors

- b) What number is Eva thinking of?

- 7 Which number has the most factors? Tick your answer.

64

48

- 8 Look at each statement.

Explain the mistakes that have been made.

- a) 20, 30 and 40 are all factors of 10

These are multiples not factors.

- b) 0.5 is a factor of 8 as 16 halves equals 8

Factors have to be integers.

- 9 How do we know that these statements are true?

- a) 5 is a factor of 195 but not a factor of 196

195 ends in 5 so 5 is a factor. 196 is one more than a multiple of 5 so 5 isn't a factor.

- b) 3 is a factor of 177 but not a factor of 178

1+7+7=15 15 is a multiple of 3 so 3 is a factor of 177. However, not a factor of 178

- c) 20 is a factor of 180 but not a factor of 190

180 ÷ 20 = 9 190 is 10 more than 180 so 20 can't be a factor

- 10 Is this statement always, sometimes or never true?

A number will always have an even number of factors because factors come in factor pairs.

Mark your work.

How did you do? Can you complete your corrections?

What does the word factor mean?

If you want to further understand multiples and factors use this link:

<https://www.bbc.co.uk/bitesize/topics/zfq7hyc>

Tuesday - Topic - Geography

L- What are the physical features of Europe?

Follow the video step by step. Write all work into your workbook or on a piece of paper. Alternatively type up and save in your Purple Mash account.

Copy and paste the website link into internet browser to access the lesson

https://classroom.thenational.academy/lessons/what-are-the-physical-features-of-europe-74wp6r?activity=intro_quiz&step=1

Tuesday - PE

L-To reflect on my throwing techniques

How was this game more difficult than yesterday?

Copy and paste the website link into internet browser to access this clip.

<https://www.youtube.com/watch?v=V22Mbjk4xYo>

Battleships: Level 2

Home Physical Education

Can you play by the rules and respect your opponent?

How to play:

- With a partner, each player places three targets (battleships) in front of them. Place an additional battleship know as the 'ultimate battleship' in the middle.
- Players take turns to throw an object towards their opponent's battleships.
- Each time a battleship is hit, it is removed. If players hit the ultimate battleship they can add back one of their battleships that has been hit.
- The winner is the first player to hit all of their partner's battleships.

Can you focus on the target and concentrate?

Top Tips

Throwing Underarm

Step forwards with one foot, releasing the ball from low to high using your opposite hand

Let's Reflect

What did you learn after each throw to adapt for the next?

How did you keep focused?

Wednesday-Maths

To be able to define and find common factors of numbers to 100.

1 Kim is using counters to find factors of 18

She arranges the counters in one row.

Then she arranges the counters in two rows.

a) Kim's array shows four numbers that are factors of 18

Which numbers are they?

b) What are the two other factors of 18?

c) Use counters to find the factors of 27

List the factors of 27

d) List the common factors of 18 and 27

Why are these numbers common factors?

2 Complete the sentences.

a) The factors of 24 are _____

The factors of 36 are _____

The common factors of 24 and 36 are _____

b) The factors of 30 are _____

The factors of 45 are _____

The common factors of 30 and 45 are _____

3 a) Write the numbers on the diagram.

b) What are the common factors of 21 and 35?

c) How does the Venn diagram help you to list the common factors?

4 List the common factors of each pair of numbers.

a)

15	20
----	----

b)

9	10
---	----

5 Which pairs of numbers have only one common factor?

2 and 6

3 and 8

15 and 12

9 and 11

49 and 21

15 and 22

What do you notice?

After you have watched the video have a go at the questions on the worksheet.

Answer in your books or on a piece of paper.

Wednesday-Maths

To be able to define and find common factors of numbers to 100.

6

All the factors of 36 are common factors of 36 and 72

Do you agree with Mo?

Explain your reasoning.

Why do you think this happens?

7

a) List the factors of 60 in order from lowest to highest.

b) List the factors of 84 in order from smallest to greatest.

c) What is the highest common factor of 60 and 84?

8

Whitney bakes 24 cakes.

Dexter bakes 30 cakes.

Boxes can hold 2, 3, 4, 5, 6 or 10 cakes.

Whitney and Dexter want to share their cakes equally into boxes.

a) Which boxes could Whitney use?

b) Which boxes could Dexter use?

c) Which boxes could they both use?

Compare answers with a partner.

9

I am thinking of two numbers between 70 and 80.
The common factors are 1, 2, 4 and 8

What are the two numbers that Teddy is thinking of?

After you have watched the video have a go at the questions on the worksheet.

Answer in your books or on a piece of paper.

Can you come up with a rule for common factors?

Wednesday-Maths

L-To be able to define and find common factors of numbers to 100

1 Kim is using counters to find factors of 18

She arranges the counters in one row.

Then she arranges the counters in two rows.

9

I am thinking of two numbers between 70 and 80. The common factors are 1, 2, 4 and 8

What are the two numbers that Teddy is thinking of?

72 and 80

Mark your work.

How did you do? Can you complete your corrections?

What does the word factor mean?

If you want to further understand multiples and factors use this link:

<https://www.bbc.co.uk/bitesize/topics/zfq7hyc>

Wednesday - Science

Lesson 1 Forces

L-What are forces?

In this lesson you will need to answer:

1. What is a definition of a force?
2. What can a force do to an object?
3. What are 4 examples of a contact force?
4. What are 2 examples of a non contact force?

Write all work into your workbook or on a piece of paper or alternatively record onto Purple Mash account.

Copy and paste the website link into internet browser to access

<https://classroom.thenational.academy/lessons/what-are-forces-6dh3ec?step=1&activity=video>

Forces

A force is a push or a pull in a certain direction. Force gives an object the energy to move, stop moving or change direction.

The illustration shows a boy with brown hair, wearing a green sweater and blue trousers, pushing a brown wheelbarrow. The wheelbarrow is filled with yellow and orange items, possibly toys or blocks. The background is a simple blue sky and white ground. A small 'melloo' logo is visible in the bottom right corner of the illustration.

Friction

Friction is a force between two surfaces that are sliding, or trying to slide, across each other. Friction always slows a moving object down as it works in the direction opposite from the direction the object is moving, or trying to move.

The illustration shows a boy with brown hair, wearing a green sweater and blue trousers, slipping on a banana peel. He is falling backwards with his arms outstretched. The banana peel is yellow and brown. The background is a simple white ground. A small 'melloo' logo is visible in the bottom right corner of the illustration.

Wednesday - PE

L-To move in time to a beat.

How can you improve your performance?

Copy and paste the website link into internet browser to access this clip.

<https://www.youtube.com/watch?v=ALmZzLVORas&list=PLnwoPgo24bhmqV8Y76iXnwYw9T9AlxbqJ&index=27&t=0>

s

Move to the Beat

Home Physical Education

Can you try quicker and slower music? Which is harder?

Can you keep trying to improve your performance?

How to play:

- On the spot can you start by clapping in time to the music?
- Keep clapping but can you now move your feet in time to the music by marching on the spot?
- Now can you start to walk around the space by clapping and walking in time to the music?
- Challenge yourself to add new movements like heel flicks, side steps, knees up, spins, turns. Can you do these in time to the music?

Top Tips

Listen for a beat

When trying to listen for a beat, make sure you give the piece of music all of your attention. Use headphones or move to a quiet environment with no noise interruptions.

Let's Reflect

What different movement ideas did you come up with?

Could you concentrate and move in time to the beat?

THE DEAN TRUST

Thursday - English

Lesson 4

L- To practice the French-derived words.

Write all work into your workbook or on a piece of paper or alternatively record onto Purple Mash.

Copy and paste the website link into internet browser to access

<https://classroom.thenational.academy/lessons/to-practise-and-apply-knowledge-of-french-derived-sounds-cmwp2d>

Thursday-Maths

To be able to define and find prime numbers up to 100.

Warm Up.

- 1) What are the factors of 25?
- 2) How many factors does 26 have?
- 3) List the first 4 multiples of 7
- 4) Circle the number which is not a multiple of 4
14 28 36 44

Click on the link below to access the learning for today

<https://whiterosemaths.com/homelearning/year-5/week-8-number-multiplication-division/>

Thursday-Maths

To be able to define and find prime numbers up to 100.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

The first prime number is 2
Shade all the multiples of 2 (but not 2) in orange.

The next prime number is 3
Shade in all the multiples of 3 (but not 3) in orange.

Repeat for the multiples of all the prime numbers up to 7

How many prime numbers between 1 and 100 are there?

Thursday-Maths

To be able to define and find prime numbers up to 100.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Mark your work.
There are 25 prime numbers
between 1 and 100.
What patterns do you
notice?

If you want to further
understand prime numbers

<https://www.bbc.co.uk/bitesize/topics/zfq7hyc>

Thursday - PE

L-To move in time to a quicker beat.

Did you keep trying to improve your routine?

Copy and paste the website link into internet browser to access this clip.

<https://www.youtube.com/watch?v=WDs7STstjH4&list=PLnwoPgo24bhmqV8Y76iXnwYw9T9AlxbqJ&index=26&t=0s>

Move to the Beat Extravaganza

Home Physical Education

Can you try quicker and slower music? Which is harder?

Can you teach your routine to someone else using clear instructions?

How to play:

- On the spot can you start by clapping in time to the music? Clap for 8 counts.
- After 8 claps, can you jump on the spot for 8 counts? Then can you jog around the space for 8 counts?
- Challenge yourself to add a final movement for 8 counts, then repeat.
- To make it harder, can you perform movements that take 8 counts to complete but do not require 8 individual counts e.g. a slide left (4 counts) a slide right (4 counts).

Top Tips

Listen for a beat

When trying to listen for a beat, make sure you give the piece of music all of your attention. Use headphones or move to a quiet environment with no noise interruptions.

Let's Reflect

Did you keep trying to improve your routine?

Did you challenge yourself to create harder movements?

Thursday - PSHE

L-To Know how to play online games safely .

Play Online Games Safely

- Never share personal information (e.g. your phone number, school or where you live) with other gamers.
- It's safest to game with friends you know in real life.
- If a gamer you don't know in real life asks you to join them on another game, app or website, don't reply, and tell an adult you trust.

Copy and paste the website link into internet browser to access this information.

https://www.thinkuknow.co.uk/8_10/stay-safe/play/

Task:

Can you create a poster for Alfie with top tips on how to stay safe when playing online games.

ALFIE'S STORY...

Someone I was gaming with kept sending me messages that made me feel uncomfortable. I told my mum. She helped me block them so now they can't message me anymore.

THE DEAN TRUST

Partington Central Academy

Friday

Friday Spelling

-able

best bet
English
root

-ible

root = 's'
root = ?

How do these words follow the same rule?

Click the link or copy and paste it into your internet browser and follow the lesson step by step.

<https://classroom.thenational.academy/lessons/to-practise-and-apply-knowledge-of-suffixes-able-and-ible-including-test-cmwkcd?activity=video&step=1>

Friday - Guided Reading

Lesson 5

L- To reflect upon the story and Victorian society.

Follow the steps and learning set out in the video link below.

Copy and paste the website link into internet browser to access

<https://classroom.thenational.academy/lessons/to-reflect-upon-the-story-and-victoria-society-6nh68t>

Friday - English

Lesson 5

L- To write the opening of The Jabberwocky.

Write all work into your workbook or on a piece of paper or alternatively record onto Purple Mash.

Copy and paste the website link into internet browser to access

<https://classroom.thenational.academy/lessons/to-write-the-opening-6gwkgf>

Friday-Maths

L-To be able to identify and name prime numbers as numbers that only have two factors.

Warm Up.

- 1) How many factors does 1 have?
- 2) List the factors of 9
- 3) List the factors of 17
- 4) What is the highest common factor of 12 and 24?

Click on the link below to access the learning for today

<https://whiterosemaths.com/homelearning/year-5/week-8-number-multiplication-division/>

Friday-Maths

L-To be able to identify and name prime numbers as numbers that only have two factors.

- 1 Aisha makes different arrays with 7 counters.
She makes an array with 1 counter in each column.

She makes an array with 2 counters in a column.

- a) Is it possible to arrange the counters in another way so that they make a rectangular array?
Draw counters to support your answer.
- b) What are the factors of 7?
- c) Explain why 7 is a prime number.

- 2 Complete the table.

Number	Factors	Is the number prime?
5	1 and 5	Yes
9		
11		
14		
15		
19		

- 3 A prime number has two factors: 1 and itself.
List the prime numbers up to 20
- 4 Is 25 a prime number?
How do you know?

- 5 Here are sequences of consecutive prime numbers.
Complete the sequences.

a) 7, 11, 13, , 19 b) 37, 31, 29, , 19

- 6 Colour all the prime numbers.

51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80

- 7 Here are some numbers.

126	175	2,378	777	381	9,000
-----	-----	-------	-----	-----	-------

Jack

The numbers are big. It's hard to check if they are prime.

I can tell quickly that none of these numbers are prime.

Annie

How does Annie know that none of the numbers are prime?
Compare answers with a partner.

After you have watched the video have a go at the questions on the worksheet.

Answer in your books or on a piece of paper.

Friday-Maths

L-To be able to identify and name prime numbers as numbers that only have two factors.

8 Mo and Alex are talking about prime numbers.

Mo

Prime numbers
are always odd.

Alex

I think prime
numbers can
be even.

Who is correct?

How do you know?

9 Teddy writes five consecutive numbers.

Three of the numbers are prime.

What are the five consecutive numbers?

10 Kim is thinking of a prime number.

It is in between a multiple of 11 and a factor of 48

What number is Kim thinking of?

After you have watched the video have a go at the questions on the worksheet.

Answer in your books or on a piece of paper.

Can you come up with a rule for common factors?

Friday-Maths L-To be able to identify and name prime numbers as numbers that only have two factors.

1 Aisha makes different arrays with 7 counters.
She makes an array with 1 counter in each column.

She makes an array with 2 counters in a column.

a) Is it possible to arrange the counters in another way so that they make a rectangular array?

No

Draw counters to support your answer.

b) What are the factors of 7?

1 and 7

c) Explain why 7 is a prime number.

It only has two factors, 1 and itself.

Number	Factors	Is the number prime?
5	1 and 5	Yes
9	1, 3, 9	No
11	1, 11	Yes
14	1, 2, 7, 14	No
15	1, 3, 5, 15	No
19	1, 19	Yes

3 A prime number has two factors: 1 and its
List the prime numbers up to 20

2, 3, 5, 7, 11, 13, 17, 19

4 Is 25 a prime number? No

How do you know?

$5 \times 5 = 25$

5 Here are sequences of consecutive prime n
Complete the sequences.

a) 7, 11, 13, 17, 19

b) 37, 31, 29, 23, 19

6 Colour all the prime numbers.

51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80

7 Here are some numbers.

126	175	2,378	777	381	9,000
-----	-----	-------	-----	-----	-------

Jack

The numbers are big. It's hard to check if they are prime.

I can tell quickly that none of these numbers are prime.

Annie

How does Annie know that none of the numbers are prime?

126, 2378 and 9000 have 2 as a factor so aren't prime. 175 has 5 as a factor. 777 has 7 as a factor. $3+8+1=12$ so 3 is a factor of 381.

8 Mo and Alex are talking about prime numbers.

Mo

Prime numbers are always odd.

Alex

I think prime numbers can be even.

Who is correct? Alex

How do you know?

2 is even and prime. It is the only even prime number.

9 Teddy writes five consecutive numbers.

Three of the numbers are prime.

What are the five consecutive numbers?

2, 3, 4, 5, 6

10 Kim is thinking of a prime number.

It is in between a multiple of 11 and a factor of 48

What number is Kim thinking of?

Mark your work.

How did you do? Can you complete your corrections?

What does the word factor mean?

If you want to further understand prime numbers use this link:

<https://www.bbc.co.uk/bitesize/topics/zfq7hyc>

Friday - PSHE

L-To Know what to do if someone is unkind online

Be kind to others online

- Think before you share: avoid posting anything that could upset someone else.
- If someone is being mean, block them and tell an adult you trust. You can also report them to the website or app. Ask an adult for help with this.
- Worried that someone has shared something hurtful about you? Ask an adult you trust to help you.

Copy and paste the website link into internet browser to access this video clip

https://www.thinkuknow.co.uk/8_10/watch/

Task:
Why do you think people were mean about Alfie's video?
What advice would you give Alfie?

Friday - PE

L-To perform yoga movements in various combination and forms.

Which was your favourite Harry Potter Yoga Pose?

Copy and paste the website link into internet browser to access this clip.

<https://www.youtube.com/watch?v=R-BS87NTV5I>
